

## Laser sensor RF LDS SPOT-ST/BU-NET Material no.: 1478268

### Product features

- For connection to wireless module RF 96 BU (up to 4 sensors per wireless module)
- Integrated Time of Flight Sensor
- Mounting with universal bracket or via enclosure flange

### Dimensions

### Technical data

#### Applied standards

EN 60947-5-2, EN 61000-6-2, EN 61000-6-3, EN 301 489-1, EN 301 489-3, EN 300 220-1, EN 300 220-2

#### Enclosure

ASA polymer, UL 94 HB, black

#### Protective screen

PMMA, transparent to infrared light 850 nm

#### Degree of protection

IP67 (IEC/EN 60529)

#### Voltage source

External voltage supply nominally 3.6 V, approx. 2 V to 5 V possible

#### Nominal current

max. 200 mA at 3.6 V

#### Standby current

max. 15  $\mu$ A at 3.6 V; no active measurement

#### Mean operational current

220  $\mu$ A with 3,6 V and 1 measurement every 5 seconds

#### Ambient temperature

0 °C ... +65 °C

#### Wireless range

10 m with sufficiently reflective targets

#### Minimum distance

40 cm, reduced accuracy with shorter distances

#### Accuracy

$\pm 20 \text{ mm} \pm 2 \%$ , at 5 m, white target

#### Field of view

2° x 2°

#### Connection

M8 plug and socket; 4-pole A coded; RS485 half duplex

#### Operation cycles

max. 12000 telegrams with repetitions/h; SW922: max. 1440 telegrams/h in combination with RF 96 BU SW...-NET-LDS

#### Note

The data are only valid in combination with radio module RF 96 BU-NET-LDS!
